

Wagering Just Got Easier!

FastBet Mobile is the most advanced smart device wagering application on the tote market and is designed to work with any smart device platform.

How it Works:

- Obtain an anonymous Virginia Gold Cup Blue card at any teller station and load the amount you would like to wager during the day via a terminal.
- Connect to the local wireless network by either accepting the Network "VGCPublic", typing in vgc.fastbetmobile.com into your browser or scanning the QR code.
- Log onto the FastBet Mobile site using the account number found on the back of your Blue card. The initial PIN number is 1234. You will be prompted to change that PIN immediately for your protection.
- The Wager screen will allow you to view the current balance on your account.
- Follow the prompts to choose the race you would like to bet, the horse and the amount and type of wagering you would like to do.
- At the end of the day return to any betting station to claim winnings from your day of wagering.

DIFFICULTIES...

If you are having difficulty connecting to "Fast Bet" with your iPhone, while connected to wifi, please try turning cellular data off by doing the following: 1) Open "Settings", 2) Select "Cellular", and 3) Turn "Cellular Data" off". To return iPhone to normal cellular data operation: 1) Open "Settings", 2) Select "Cellular", and 3) Turn "Cellular Data" On".

Deactivate Cellular Data:

Settings > Cellular > Cellular Data "Off"

Reactivate Cellular Data:

Settings > Cellular > Cellular Data "On"
